Thank you for your interest in Skinners – the revolutionary ultraportable sock shoes.

Knitted fabric composition:	adults	children
	48 % Polypropylene	70 % Polyamide
	18 % Viscose	13 % Polypropylene
	18 % Cotton	13 % Cotton
	9 % Elastane	2 % Polyurethane
	4 % Polyester	2 % Elastane
	3 % Polyamide	

Bottom layer: 2 layers of a phthalate-free anti-abrasive polymer compound. The material's country of origin is Sweden.

Made: In a super-secret factory in the heart of Europe (CZ).

Skinners are not a full-time substitute for your regular footwear. Skinners are not recommended for extreme conditions. To maximize your comfort and minimize unwanted odor, we recommend wearing thin socks inside your Skinners.

The size of Skinners is approximate: before the first use, try out the size you have bought. Small or tight footwear may restrict blood supply to the limbs. If you suffer from orthopedic or other problems, we recommend consulting a doctor before using the product.

Skinners are handmade, which means each pair is unique and might differ slightly in terms of appearance. Initial crumbling of the bottom layer is normal and caused by surplus material. The product is partly cut-, puncture- and weather-resistant.

Maintenance: Allow Skinners to dry out and aerate after every use. It is recommended to wash your Skinners in a washing bag on a gentle cycle at 30 °C/86 °F or to hand wash them. Do not use a spinning program and dryer when washing.

Manipulation: To prevent damage to your Skinners and prolong their lifespan, always take them off gently by hand. If you try to peel off the bottom layer, your warranty is lost.

Skinners are produced without harming people, animals or the environment. The product is vegan and barefoot friendly. For any further questions or information, contact us at hello@skidders.cc or visit www.skidders.cc.

Patented design and technology

INSTRUCTIONS

Tip:

Wear thin socks in Skidders to maximize your comfort and reduce unwanted odor.

Liability Disclaimer:

Skidders are abrasion- as well as cut-resistant. Skidders are not abrasion- or cut-proof. While they provide reasonable resistance to abrasions and cuts, objects can penetrate them at any given time or in any given situation. Skidders are partially puncture-resistant, but not puncture-proof. Be careful of sharp objects (such as nails, sea urchins, etc.), which can penetrate Skidders without resistance.

Skidders are protective, but not completely resistant to every potential danger to your feet. Beware of potential dangers on the surfaces you walk on. Be careful when riding escalators and using moving walkways: 1) Stand facing forward in the center of the step. 2) Step on and off carefully. 3) Do not touch the sides below the handrail. 4) Avoid the sides of the steps where Skidders can become entrapped. Skidders are a product that wears out over time and has a certain lifespan dependent on the regularity of usage.

No claims, representations or warranties, whether expressed or implied, are made by our company as to the safety, reliability or performance of Skidders. In no event shall our company be liable for any direct, indirect, punitive, incidental or consequential damages, to property or life whatsoever, arising out of or connected with the use or misuse of our product.

Intended use:

Skidders are suitable for outdoor use on soft ground, sandy and forest paths, beaches, in gardens, for water sports and swimming. While Skidders are protective, they can still be punctured or cut by shells, corals, stones, sea urchins, etc. Skidders are not suitable for long-term use on asphalt roads and paths with sharp objects; their durability may decrease as a result of such use.

We believe that Skidders will become your handy companion during all of your travels, sports, and adventures.
